What you can achieve is virtually unlimited. With this technology, you may turn wood appearance to stone, paper to metal, plastic to gold on the carpet. You are free to use anything in your mind on the carpet pattern...

If you want to create surfaces which are worn-out due to natural conditions or long-years of use, you don't have to wait for years anymore. You can create a very cozy ambience with our methods which will give a vintage feeling to your indoors.

Renk ahenk Harmony of colours

Renkler insan doğasının merkezinde bulunsunlar. Bu yüzden yaşam alanlarımızı düzenlerken renklerle aynı bu izleni vermeye çalışmalıyız. Özellikle iç mekanlarımızda. Eğer ışık tarafından oluşturulan renkler olmasaydı çevremizi göremiyorduk. Hiç renk olmadı ne de nâarı, hiçbir şeyi ayırt edemeyizdik.

Colour occupies a central place in the human nature. therefore, we should place a special importance on colour while decorating our living spaces. Particularly in our indoors. If there was no colours created by the light, we couldn't see even with shades of grey. Neither colour would exist, nor nuance, we couldn't distinguish anything.

Halı döşerken renk seçimi; Color selection for carpeting;

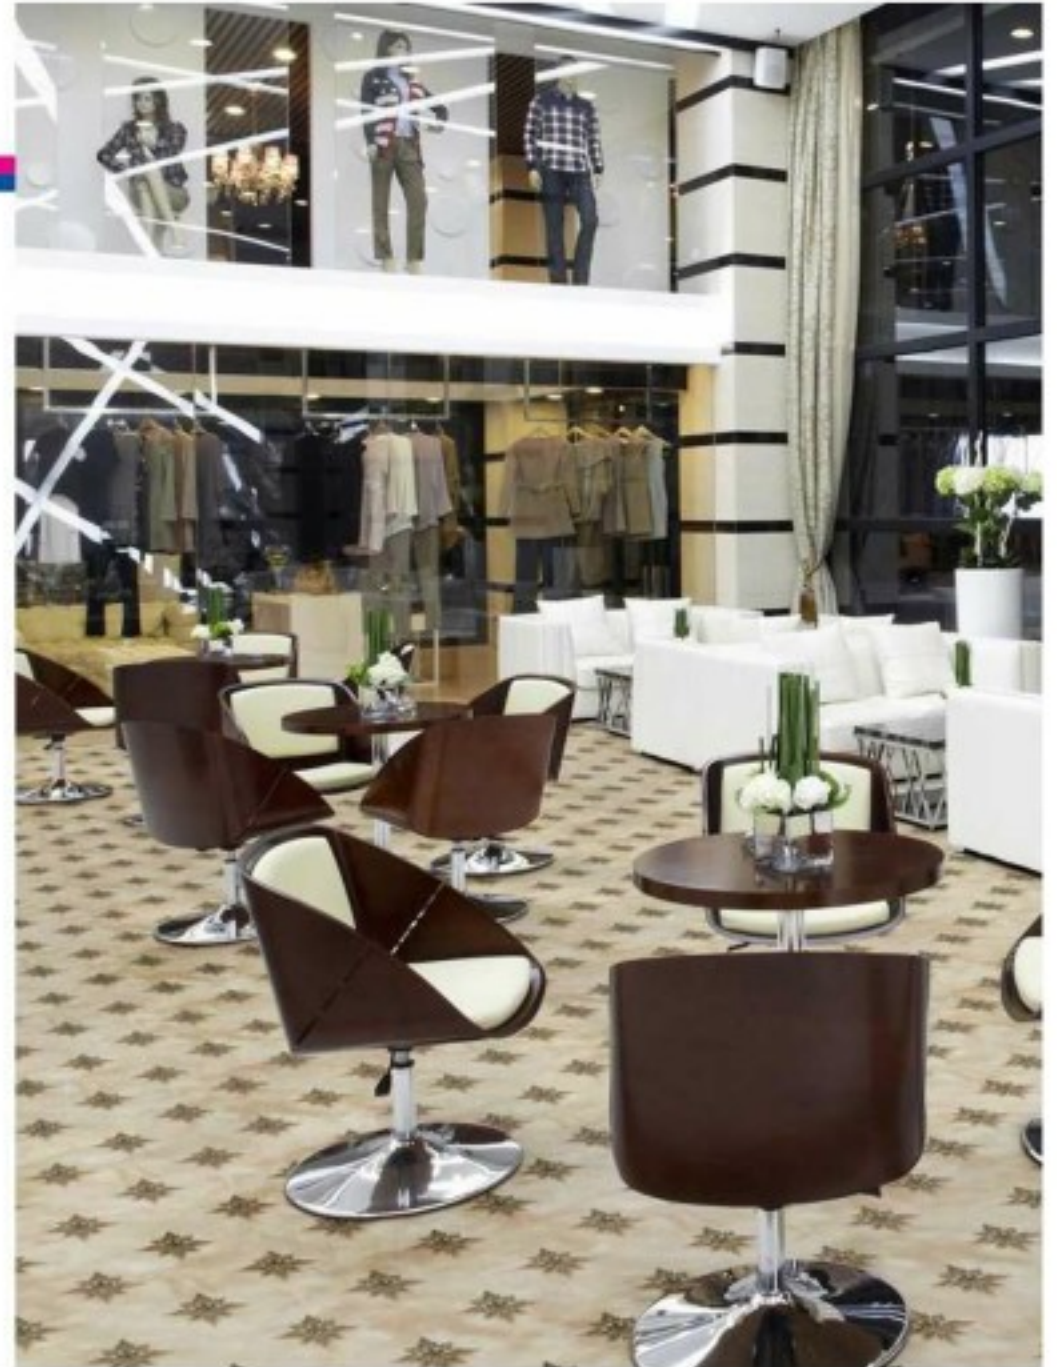

Açık renkler küçük odalara geniş bir görünüm, koyu renkler ise büyük odalara daha sıcak ve daha rahat bir izlenim kazandırır. Halının rengi mekândaki ışığa göre değişecektir. Örneğin gün ışığı altında halının rengiyle, halıya direkt yansıyan bir lambanın ya da yandan aydınlatmanın, halının rengi üzerindeki etkiyi farklıdır.

Renkleri doğru yerlerde kullanmayı bildiğiniz zaman, mobilyalarınıza bile yerini değiştirmeye gerek kalmadan mekânlarınız dönüşüm geçirir. Renkler ile optik illüzyonlar yaratabilir ve hacmin görsel algısını değiştirebilirsiniz.

Lighter colours give a wider outlook to the smaller rooms, darker colours give cozier and more comfortable impression to the larger rooms. The colour of the carpet will vary with the light in the space. For example, the effects are different between the colours of carpet which is lightened by floodlight or a lamp reflected to the carpet and under the daylight.

If you know how to use colours at right places, your indoors transform without necessarily changing places of your furniture. You may create colourful optical illusions and change the visual perception of the volume.

Duvardan duvara halılar; desen, renk ve doku seçerinde nezdensiz
sınırsız olasılıklar sunar ve bu esneklik nedeniyle özellikle proje
uygulamalarında tercih edilirler. Turistik tesisler, ofisler, okullar,
restoranlar, mağazalar, bankalar, hastaneler, ticari ve sosyal mekânların
ihtiyaçları dikkate alınarak hazırlanan, özel komitükasyon ve desenlerle
üretilen halılar Kontakt Halka olarak anılmaktadır. Bu tür mekânlar için
halı seçimi yapılırken; kullanım amacına uygun, bakımı kolay ve estetik
bir ürünün tespiti edilmesi son derece önemlidir.

Wall to wall carpets are chosen for project applications due to their
flexibility and the richness of choices in pattern, colour and structure.
Carpets that were prepared for the needs of tourism facilities, hotels,
offices, restaurants, stores, banks, hospitals, and commercial and social
spaces are called as "contact carpet". They have to be aesthetic, easy
to care and purpose oriented. Better quality of a contact carpet is hard
to wear out under normal conditions. When deciding on floor coverings,
aesthetics considerations and performance of the product should
be taken care objectively. It should be the best choice depending
on its usages. Most of the time, carpet is the right choice for project
(contact) applications. It has a perfect combination of advantages
against other floor covering materials.
